MEMORANDUM FOR: Chiefs of Schools

SUBJECT : OTR History

1. It was my intent to describe the development of the various schools in OTR in the general historical narrative and not bother the school chiefs any more than necessary. DTR feels he would like a separate monograph on each school and its development. I am not sure yet that this is actually workable. [REDACTED] is writing a separate history of Language Training. There will be a separate history of [REDACTED] Covert Training. I would appreciate it if the school chiefs or whoever they designate to work on this history would confer with me some time soon regarding this project.

2. The OTR vital records contain considerable material from the separate schools. There are files from the Intelligence School covering the years 1951 - 1963. The Operations School has files available from 1954, at least. There do not seem to be any separate files in the vital records from the School of International Communism. However, the weekly reports are available dating back to the time Matt Baird became DTR. Personnel records, budget narratives, and miscellaneous material is available in quantity. I hope to screen most of this material myself but would like to share this burden. I am attaching a few miscellaneous items for what they may be worth.
